

## E-DEMOCRACY

Critical issues put forward by the NWO Secretariat will go to on-line vote  
Each of our members will cast an on-line vote by simply pressing:  
Green light (yes) - Red light (no) - Amber light (undecided)

The Natural World Organization intends to harness the greatest planetary  
consensus from all people and institutions of the world  
committed to challenging rogue leadership  
and unlawful governance  
across the globe

## World Alliances & e-Democracy

The **Natural World Organization** is forging strategic alliances with like-minded NGOs, institutions and watchdog organizations across the globe in all nations. The **NWO** will thereby function as a unifying interface for all parties seeking active realization of justice, accountability and transparency from *public officials* and *institutions* mandated to serve people of the world and the interests of our planet.

**Communities, institutions** and **networks** of the world are invited to apply for membership within the **Natural World Organization**. *Institutional Members* will be reflected in the organizational structure and on the web-platform - the '**NWO-Network**, as well as be linked to the **NWO** website.

*Individual Members* will participate actively in all ongoing **NWO** activities via an **e-democracy** protocol which will allow for consensual decisions to be arrived at in all endeavors. The Secretariat will propose measures and all members will be duly notified in order to cast e-democratic votes online or via email response. The votes will determine a '**Public Consensus**' and this consensus will be duly reflected in the actions of the **Natural World Organization**. This planetary consensus will empower the Natural World Organization to directly challenge and apprehend offending public officials and/or their institutions.
